ABOUT

Final-year B.Tech. student with hands-on experience in data analytics, machine learning, business intelligence, and product analytics. Skilled in Python, SQL, Pandas, NumPy, Excel, Power BI, RFM analysis, customer segmentation, KPI analysis, and statistical analysis.

EXPERIENCE

Codementees | Backend Developer & International Business Development Associate | Sep 2026 – Present

- Redesigned the live-quiz database schema using Redis, caching, and connection pooling, enabling **45,000+ concurrent student submissions** during peak exam-prep windows without failure.
- Configured AWS horizontal auto-scaling and cloud infrastructure, maintaining **99.99% platform uptime** during a **4x traffic surge** on national exam day.
- Mapped customer journeys, payment-gateway friction, and conversion funnels, reducing checkout abandonment by **15%**; collaborated on a personalized recommendation engine that increased cross-sell purchases by **32%**.

IIT (BHU), Varanasi | Intern, Advanced Manufacturing | Jun 2026 – Jul 2026

- Worked on robotic Wire Arc Additive Manufacturing (WAAM) using the Cold Metal Transfer (CMT) process on an active robotic additive-manufacturing setup.
- Analyzed deposition behavior and process parameters across operating conditions to support print-quality consistency and structured interpretation of manufacturing outcomes.

Triple One Solutions | Data Science Intern | Jun 2026 – Jul 2026

- Applied Python, Pandas, NumPy, and Scikit-learn for data preparation, exploratory data analysis (EDA), feature engineering, model building, and model evaluation.
- Worked across the data-science lifecycle from raw-data preparation to machine-learning analysis, evaluation, and communicating results.

Bharat Heavy Electricals Limited (BHEL), Varanasi | Intern | May 2026 – Jun 2026

- Reviewed production workflows and quality-control practices across industrial power-equipment manufacturing operations, focusing on process consistency and shop-floor execution.
- Observed maintenance procedures, inspection practices, and manufacturing discipline in an industrial environment.

PROJECTS

E-Commerce Customer & Sales Analytics | Python, SQL, Pandas, Power BI, RFM, Data Visualization | [Live Demo](#)

- Built an end-to-end customer and sales analytics dashboard using Python, SQL, Pandas, RFM analysis, customer segmentation, KPI analysis, profitability analysis, and data visualization.
- Found **77.5% of revenue** from the top **40% of RFM customers**; identified a **27 percentage-point** margin gap on 26–40% discounts and **7.5x** higher customer cost for Paid Social.

RazorShield AI – Payment Risk & Fraud Detection Agent | Python, Pandas, Scikit-learn, Streamlit, Classification | [Live Demo](#)

- Built a transaction-level ML risk scoring workflow using feature engineering, classification, Precision, Recall, F1, ROC-AUC, and PR-AUC for payment-risk analysis.
- Achieved **92.17% ROC-AUC** and **74.60% Recall @ Intervention**, supporting data-driven approve, verify, and review decisions.

Predictive Maintenance System for Rotating Machinery | Python, Pandas, SciPy, Scikit-learn, FFT, Streamlit | [Live Demo](#)

- Analyzed vibration data, signal preprocessing, FFT features, and machine-learning classification using the CWRU bearing dataset.
- Achieved **100% test accuracy** on **116 leakage-safe held-out samples** across four bearing-condition classes.

PrepPilot AI – AI Mock Interview Platform | Python, FastAPI, Streamlit, OpenAI API, Analytics | [Live Demo](#)

- Built an analytics workflow for resume parsing, question generation, answer evaluation, session management, and performance tracking using Python and LLM APIs.
- Implemented REST API design, testing, application analytics, and cloud deployment across the product lifecycle.

EDUCATION

Madan Mohan Malaviya University of Technology, Gorakhpur | B.Tech. in Mechanical Engineering | 2023 – 2027

- Relevant Coursework: Data Analysis, Machine Learning, Web Data Mining, Data Visualization, Data Science with Python, Data Science with R, Manufacturing Processes

TECHNICAL SKILLS

Programming: Python, SQL (MySQL), R, JavaScript

Data Analytics: Pandas, NumPy, SciPy, MS Excel, Power BI, Data Cleaning, EDA, Data Visualization, Dashboarding, Statistical Analysis

Business & Product Analytics: RFM Analysis, Customer Segmentation, Revenue Analytics, Retention Analysis, Profitability Analysis, Marketing Analytics, KPI Analysis, Customer Journey Mapping, Conversion Funnel Analysis

Machine Learning: Scikit-learn, Regression, Classification, Random Forest, Feature Engineering, Model Evaluation, Precision, Recall, F1, ROC-AUC, PR-AUC

Tools & Development: FastAPI, REST APIs, Streamlit, Git/GitHub, Postman, AWS, Redis, MongoDB, Jupyter

CERTIFICATIONS & ACHIEVEMENTS

- Data Analysis with AI - Internshala
- Data Analysis / Data Science Certification - MOOD Indigo, IIT Bombay / Triple One Solutions
- GenAI Camp - AlgoUniversity
- British Airways Data Science Job Simulation - Forage
- Deloitte Data Science Job Simulation - Forage
- 200+ LeetCode problems solved across Data Structures and Algorithms
- NSS Volunteer; Final-Year Project Team / Group Leadership
